

MSPs who are Wise Connect with SkySwitch

Who Is SkySwitch?

SkySwitch is the US-based, next-generation communications platform provider offering white labeled Unified Communications-as-a-Service (UCaaS) solutions to telecommunication and business technology resellers, MSPs, ISPs, WISPs, interconnects and agents across North America.

SkySwitch provides MSPs and resellers with the competitive advantages required to succeed in today's overcrowded marketplace by combining best-in-class customer support with an advanced cloud-based UCaaS platform, delivering feature-rich voice, video, text and fax communications.

What Others Have to Say

“

We haven't really found anything it [the SkySwitch platform] can't do for us. I like to tell our customers that it can do anything they need it to do and that's what we sell on — the fact that we can make their system perform and do exactly what they need it to do.

— **Louis LeBlanc**
Founder at Oregon Phone Systems

”

SkySwitch Services

Cloud Voice/Hosted PBX

A robust platform with true carrier-class reliability

SIP Trunking

Provide dial tone to any native SIP or legacy PBX with our easily scalable solution

Business SMS

Give customers the ability to create SMS campaigns and automated reminders

Video & Web Conferencing

Offer high-quality, high-margin conferencing services and appliances

Video Surveillance (VSaaS)

Sell and manage a video surveillance platform that's tailor-made for SMBs

Voice API

Our platform leverages industry-standard SIP to provide innovative and integrated UC services

Contact Center & CCaaS

Deploy a high-quality experience without significant investment

Virtual Fax

Cloud fax technology with store-and-forward fax servers to eliminate typical VoIP faxing problems

SkySwitch Partners & Integrations

SkySwitch + ConnectWise

SkySwitch has integrated with ConnectWise to empower MSPs and Resellers with simple cloud PBX management. Our integration combines the power of the SkySwitch platform with the features and familiarity of ConnectWise Manage.

As a ConnectWise Certified Integrator, we give MSPs the ability to:

- Have UCaaS at your fingertips without leaving ConnectWise Manage
- View real-time key metrics on the SkySwitch pod, like users, registered devices, phone numbers, calls and minutes and more
- Build PBX domains on the fly within ConnectWise Manage

Advanced SIP Trunking Platform

With an unmatched white label SIP Trunking platform and a customizable online storefront for end-users, SkySwitch makes it easier for MSPs to sell and support SIP Trunks, and manage previously deployed SIP Trunks. MSPs and resellers can sell advanced, pre-configured SIP trunks to end-users through an online storefront that can be completely customized and branded through the SkySwitch Dashboard.

SkySwitch + ConnectWise Billing Integration

With our billing integration, customers can move, add and change flow seamlessly into Connectwise Agreements, eliminating duplicate data entry and potential leakage. The integration also supports full telecom taxation in concert with our ecosystem partners.

3CX Certified

SkySwitch is proud to be a Platinum 3CX Solutions Provider. Our SIP Trunks seamlessly work with 3CX, which makes us a one-stop-shop for licensing, hosting, trunking and billing.
